

I am a subscriber to XM satellite radio and love everything they offer! Regular radio stations today have way to many commercials while XM offers commercial free channels. The addition of traffic and weather is a big help, I live in a small community so when I travel to the city the traffic channel is a great help for me and others like me. Radio is for music and with so many commercials on normal stations I just can't listen to them so I choose XM and I hope you do also! Thank you for your time.
